

Cell Towers (Ordinance 2001-293-E)

Situation:

Proliferation of unsightly towers through out the city but the need to have service.

Process:

Work with the elected officials and the Industry and their attorneys to create a process that would meet the needs of the industry while preserving the city.

Results:

Cell tower ordinance that promotes camouflaged and stealth and co-location that is administratively permitted thereby saving the Industry time and money while being able to improve capacity for cell phone users. It rewarded companies to co-locate and use camouflage technology for the towers thereby reducing the need and number of unsightly monopole cell towers.
